Martindale: The Complete Drug Reference

Edited by: Alison Brayfield, Royal Pharmaceutical Society, London, UK.
Edition: 39th
Readership: Pharmacists and all healthcare professionals.
Product summary: Martindale: The Complete Drug Reference provides unbiased and evaluated information on drugs and medicines in use around the world. It is prepared by an experienced team of pharmacists and life scientists who use their professional expertise to select the most clinically relevant and appropriate information from reliable published sources, to provide an unbiased and evaluated digest of the literature.

Brief contents:
Includes:
- Over 6,300 drug monographs (and over 7,500 online, accessible via a MedicinesComplete subscription)
- Over 185,000 preparations (and over 270,000 online via MedicinesComplete)
- Over 54,000 reference citations
- Over 20,000 manufacturers and distributors
- Proprietary preparations from 43 countries and regions
- Nearly 700 treatment reviews, with references from the published literature
- Enables identification of medicines, the local equivalent and the manufacturer
- Includes herbals, diagnostic agents, radiopharmaceuticals, pharmaceutical excipients, toxins, and poisons as well as drugs and medicines

Sample PDF’s of each section will be available shortly before publication date at www.pharmpress.com/martindale39

Changes to this new edition:
- More than 130 new monographs including:
  - Lumacaftor: a cystic fibrosis transmembrane conductance regulator (CFTR) protein corrector
  - Pitolisant: a central stimulant used in the treatment of narcolepsy
  - Rolapitant: a neurokinin-1 receptor antagonist that is used for the prevention of nausea and vomiting associated with cancer chemotherapy
  - Umeclidinium Bromide: a quaternary ammonium antimuscarinic used as a bronchodilator in the treatment of reversible airways obstruction
- New Hepatitis C treatment table and drugs including ledipasvir, ombitasvir, paritaprevir, and dasabuvir
- Coverage of proprietary preparations in 43 countries including Australia, China, UK, and USA, revised and updated
Unique Benefits:

- **Breadth:** No other source has this breadth of coverage or level of detail, making it the ideal first-line reference work as well as a trusted source of information for detailed drug enquiries.
- **Global coverage:** *Martindale* is the leading resource in terms of international coverage, with over 43 countries covered – alternative publications have a narrow regional focus.
- **Objectivity:** Respected for the accuracy of content and independence from pharmaceutical industry. Based on published information and extensively referenced.
- **International adoption:** Recognised and adopted worldwide.

International Scope:

*Martindale* is depended upon by healthcare professionals throughout the world for its reliable and comprehensive information on international drugs and medicines. It is widely recognised for its unbiased and authoritative nature, as well as its unprecedented international coverage. A team of experts ensure and evaluate only the most clinically relevant and reliable information – giving healthcare professionals absolute confidence in the details of proprietary preparations from 43 countries and regions.

Since pharmacists are increasingly requested to fulfil prescriptions issued in other countries, *Martindale* represents a critical tool for identification of the local equivalent of the prescribed drug – perhaps available under a different name – and for assessing what alternatives might be suitable.

Format Availability:

**Book:** Hardback, two volumes  
**ISBN:** 978 0 85711 3092  
**Price:** £550  
**Format:** 276 x 219mm

**Online via MedicinesComplete:**  
*Martindale* is also available online via MedicinesComplete, alongside an extensive range of the world’s most trusted drug information resources – all of which are fully searchable and regularly updated. See [www.medicinescomplete.com](http://www.medicinescomplete.com)

Reviews from the previous edition:

“...an invaluable source of information for clinicians, pharmacists, pharmacologists and toxicologists and anyone interested in researching all there is to know about a certain drug,”

**Dr Johann Grundling, Australian Prescriber, October 2014**

“For many pharmacists and pharmacy students internationally the Martindale is the reference for medicines”

“Martindale is a true universal reference and its information wealth is unparalleled”  
... But a pharmacist can also not live without”  
**J. W. F. van Mil, Int J Clin Pharmacy Sept 2014**
