FASTtrack: Pharmaceutical Compounding and Dispensing
New second edition

Authors: Christopher A Langley and Dawn Belcher

An essential revision guide for pharmacy students!

This FASTtrack title assists the student compounder in understanding the key dosage forms encountered within extemporaneous dispensing. The second edition has been fully-updated and reflects recent changes in labelling and ingredient availability.

“This book has the ability to stand as both a perfect revision guide and possible reference resource......”
Future Pharmacist, British Pharmaceutical Students Association on the First edition of FASTtrack: Pharmaceutical Compounding and Dispensing
